To order: www.Orders.CancerSupportCommunity.org

Thank you for your interest in the Cancer Support Community’s Frankly Speaking About Cancer education series. The following is a list of publications available for patients, caregivers, and health care providers. Publications are available in print and PDF at no cost using the above links.

**Frankly Speaking About Cancer: Acute Myeloid Leukemia**
This guide is for people diagnosed with acute myeloid leukemia (AML). It contains a quick overview of treatment options, questions to ask your health care team, a worksheet to help you set your own goals, and resources for information and support.

**Talking About Acute Myeloid Leukemia**
This guide is for people diagnosed with AML. It contains a quick overview of treatment options, questions to ask your health care team, a worksheet to help you set your own goals, and resources for information and support.

**Treatment for AML**
This booklet covers AML treatment options and strategies for how to cope with an AML diagnosis. It includes a list of questions to ask your health care team and a detailed breakdown of the side effects of AML treatment.

CONTINUED ON REVERSE SIDE
AML: Improving Communication with Your Patients
This guide is for nurses, social workers, navigators, and other health care professionals. It provides insight into key unmet needs and areas of concern for AML patients and gives guidance on how to discuss treatment goals and options, quality of life, and other important topics.

Looking at Leukemias: Acute Myeloid Leukemia
On this radio show, hosted by CSC, we take a look at recent developments in AML research with one of the nation’s foremost experts on blood cancers, Dr. Thomas LeBlanc.

Advances in AML
On this radio show, hosted by CSC, Dr. Jessica Altman brings us up to speed on the new treatments and new approaches to treating AML.

AML Patient Testimonial
In a series of short video clips, Peter, who lives with AML, discusses his experience. Topics include diagnosis, transplant, hospitalization, caregiving, talking to kids about cancer, and general tips for living with AML.
